## RUGGED SHOULDER PROTECTION

Provide a strong assertive look while delivering improved soft surface traction and increased shoulder protection. The shoulders are not only distinctive, they protect the upper sidewall from damage.

## GENTLE WHISPER GROOVE™ SHIELDS

Provide stronger and more durable layers under the full tread area to protect against road hazards and stone damage. Durable Technology<sup>TM</sup> steel belts deliver improved tyre safety.

### HIGH TENSILE LIGHT TRUCK BODY PLY

Cords protect your tyre from sidewall abrasion and increases resistance to sidewall damage. Durable Technology™ body ply cords deliver improved tyre safety.

### GENTLE WHISPER GROOVE™ SHIELDS

Contain tread pattern noise within the tread area to deliver even lower tread pattern noise (20% less) for increased incabin comfort. ("Listen to the music")

#### **DEEP TREADS**

Remain a key feature on the LT $^{\text{TM}}$  and XLT $^{\text{TM}}$  and with a combination of Durable Technology $^{\text{TM}}$  Coupled Silica Compound, reduces tread damage from cut and chip while delivering premium traction and tread life.

## MAXIMISED FULL-DEPTH MICRO GAUGE SIPING

With more biting edges allows the tread blocks to interlock, giving you increased grip, handling and safety for the entire life of the tyre.

MAXIMISED FULL-DEPTH MICRO GAUGE SIPING Video

# **ROCK LEDGES**

At the base of the tread blocks are designed to reduce stone retention and stone drilling, while also increasing tyre protection from hazards through less case exposure.

## **NEXT GEN SILICA COMPOUND**

Provides a cut and chip resistant compound for improved tread life and mileage. The fit for purpose silica content in the AT3LT™ and AT3XLT™, is optimized to deliver more grip, improved safety, extended tread life.
