

H/T PLUS

HIGHWAY TERRAIN

90% Road & Sand, 10% Dirt & Mud

For a quiet, comfortable ride and the added benefit of having deeper treads, the Cooper H/T Plus gives you extra grip and longer tyre life.

Features

WIDE CIRCUMFERENTIAL GROOVES

On the outer tread pattern efficiently evacuate water from the tyre, giving you excellent protection against hydroplaning.

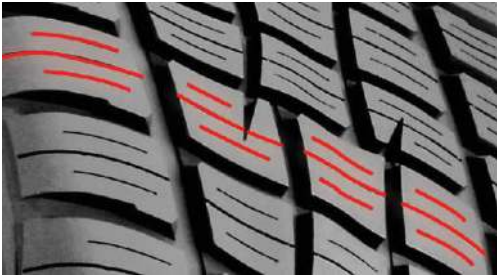

VARIED TREAD BLOCK PITCH SEQUENCE

Reduce tread-related noise whilst giving you a faster steering response.

SWEEPING LATERAL GROOVES

Efficiently disperse water to avoid hydroplaning. These lateral grooves give you up to 46.3% more depth than many original equipment tyres.

HIGH DENSITY SIPES

Across the tyre allows more water to be squeezed out in every rotation, giving you increased safety and handling.
